SAP ECC, SAP SRM, In-house web apps

Implementation Partner

IOVIO Netherlands; IBM India

Central Test Management Team goals & objectives

- Ensure business continuity on mission-critical applications & systems
- Establish standardized processes to achieve predictable outcomes
- Embrace innovation by adopting latest technology trends
- Respond quickly to business innovation initiatives
- Enforce high-quality standards throughout the application lifecycle process

Qualibrate One-Click Solution

- 500+ HGP / Supplier Relationship Management test scenarios covered
- 7 OpCo's covered as part of the automated regression suite
- Fully automated "One-Click" regression run achieved in ~9 hrs
- Automatic generation of Quality dashboards across functionalities, flows and OpCo's

“*Qualibrate is a new test automation tool in the SAP world. In the pilot both partners (Qualibrate and IBM CTM) are collaborating together in order to make the SAP test automation a valued E2E service. We appreciate the "thinking with us mentality" and "pro-active service attitude".*

System Maintenance & Test Factory Manager

The key benefits

- **Speed:** Enable business agility (90% gains)
- **Quality:** Decrease risk of business disruption
- **Efficiency:** Optimize use of available systems and resources

Traditional approach – a.k.a. Manual Regression
