

Large international Dutch retailer saves 80% time and resources while increasing quality and test coverage of their SAP FMS implementation with Qualibrate.

Industry	Products & Services	Applications in use	Implementation Partner
Retail & Fashion	International clothing brands	SAP Fashion Management Solution (FMS)	IOVIO Netherlands

Goals & objectives for SAP FMS QA team

- Ensure business continuity while rolling-out SAP FMS to operating brands
- Embrace innovation by adopting latest technology trends
- Enable process owners to quickly and easily translate their business knowledge into high value automated (regression) test scenarios
- Free-up critical IT & business resources from costly manual regression testing activities

Achievements

- 5 business work-streams, covering 160+ potential business scenarios
- Increased PO and article validation to 100% correctness and completeness (90% coverage increase achieved over previous process of manually spot-checking 10% of loaded data)
- Intuitive Qualibrate UI allows business users to be involved in setup of automated test scenarios at low time cost
- Business users saving >80% on test related activities
- Established the foundation for visibility on regression testing, enabling the possibility of setting a shared expectation of system quality levels
